

ASPEN LASER

July 6, 2021

To our future valued customer:

We would like to sincerely thank you for your interest in our products and company. At Aspen Laser Systems, we are passionate about Photo-Medicine, specifically Photobiomodulation Therapy, and what it can do today and what innovation it can bring to the future. Treatments provided by Aspen Laser Systems are emerging as a safe and effective alternative to other drugs by providing light energy into diseased or injured soft tissues, stimulating the body's natural ability to heal itself without side effects.

We are confident that as you take the time to learn more about our technologies and products that you will find them to be high quality, effective and affordable. We continue to strive for excellence and lead the charge in helping healthcare practices reach new heights with positive clinical outcomes. We believe that our commitment to research and development will allow Aspen Laser Systems to achieve this.

Currently, Aspen Laser Systems uniquely offers a variety of laser models: the exciting new Apex Laser Series offering three wavelengths with high power diodes and introducing the new 1064nm wavelength, the durable Pinnacle high power dual wavelength laser series and the portable Summit dual wavelength series, each designed to provide choices that best meet the clinical need or budget of any size healthcare practice. Whether you are new to the world of Photobiomodulation Therapy and buying your first laser or looking to upgrade or expand your existing laser therapy program, we offer turnkey solutions and resources for your success.

When you purchase a product from our company, you not only benefit from our advanced technology, but also the years of experience that myself and our management and sales team have. Our people truly make the difference.

Today, we extend a personal invitation to join us in changing lives and discover what the Aspen Laser System can do for your practice and your patients (they will love you for it!).

Sincerely,

Charles E. Vorwaller
